isbn:9780750657389

The author enables novices to get to grips with the programming language quickly and efficiently, and demystifies the subject matter making it easy to understand. Java and C++ are now the two clear leading languages for technical and web programming, and

the C++ language and environment, including C, are internationally standardised by the ISO Standard 1998. Although focusing on C++, the text also incorporates material on the C programming language. If you want to know how to: - Write ISO C++ programs - Write procedural C programs - Use ISO C++ advanced features such as templates and RTTI - Take advantage of the Standard Template Library - Program with both the C and C++ Standard Libraries then C++ Programming Made Simple is for you!

*Aimed at a non-North American user audience *Requires no technical or in-depth computer knowledge *Enables readers to become familiar with the C++ and C programming languages quickly and efficiently
