"The Complete MRCP" is a series of 3 books that cover the whole of the written section of the Part 1 and Part 2 exams for the College of Physicians qualifications. All three books were originally written by registrars and senior registrars, all of whom were closely involved in Membership-level teaching. As a result they are the books most highly regarded by those preparing for the exams and they are essential for all those taking the qualification. The MRCP itself is a very difficult professional qualification. It is jointly organised by the three UK Royal Colleges of Physicians - Edinburgh, Glasgow and London. The format of the exam is constantly changing to reflect the patterns of medicine and roughly 4000 candidates apply to take the MRCP every year. Part 1 of the MRCP is exclusively general medicine, consisting of 60 MCQs and common to all three Royal Colleges of Physicians. This book consists of 300 practice MCQs with detailed answers, in the format the candidate will encounter in the exam. The questions reflect the fact that the basic science content of the exam is increasing.
