A child-friendly book that brings the power of numbers directly to early learners. Designed by experts in elementary education, the "Brighter Child Book of Numbers" offers children critical number writing and recognition skills in fun, easy-to-understand

lessons. Its systematic approach first teaches students how to recognize, trace, and write numbers as they complete a variety of exercises that help them develop early math skills. Later lessons help them apply these skills as they learn how to add, subtract, tell time, and count money. What makes The Brighter Child Book of Numbers so different from other books? It's the most complete book that offers: - Practice and reinforcement of number recognition and writing. - Full-color, kid-appealing illustrations and exercises to help students succeed by applying numbers to early math. - Accuracy in solving simple math problems for test-taking. - A special section that features number songs, rhymes, and activities to make learning math fun. The "Brighter Child Book of Numbers" is the essential guide for young math learners
