isbn:9780713683431

This book contains invaluable reference tables and maths formulae for trainee and professional marine engineers. Focussing on subjects most commonly required in mechanical and marine engineering (including a section on naval architecture), the formulae are graduated to cover the subjects at all stages from technician level to degree, from cadet level to the Extra First Class Certificate. After each subject, there are blank pages in which extra design data and formulae can be added, and where the understanding of basic concepts is particularly essential, the text includes extra definitions and notes, all of which helps to create a user-friendly and practical resource.
