A unique alternative to more traditional, encyclopedic introductory texts, *Anthropology: What Does It Mean to Be Human?* takes a question-oriented approach

that illuminates major concepts for students. Structuring each chapter around an important question, the authors explore what it means to be human, incorporating answers from all four subfields of anthropology-cultural anthropology, biological anthropology, linguistic anthropology, and archaeology-and offering a more balanced perspective than other texts. They address central issues of the discipline, highlighting the controversies and commitments that are shaping contemporary anthropology.

作者介绍:

目录: Chapter 1: What Is Anthropology?

What Is Anthropology?

The Concept of Culture

The Cross-Disciplinary Discipline

The Uses of Anthropology

Module 1: Anthropology, Science, and Storytelling

Some Key Scientific Concepts

Chapter 2: Why Is Evolution Important to Anthropologists?

Evolutionary Theory

Material Evidence for Evolution

Pre-Darwinian Views of the Natural World

The Theory of Natural Selection

Unlocking the Secrets of Heredity

Contemporary Genetics

Genotype, Phenotype, and the Norm Of Reaction

What Does Evolution Mean?

Chapter 3: What Can Evolutionary Theory Tell Us about Human Variation?

Microevolution

Macroevolution

The Future of Human Evolution

Module 2: Dating Methods in Paleoanthropology and Archaeology

Relative Dating Methods

Numerical Dating Methods

Modeling Prehistoric Climates

Chapter 4: What Can the Study of Primates Tell Us about Human Beings?

The Primates

Approaches to Primate Taxonomy

The Living Primates

Flexibility as the Hallmark of Primate Adaptations

Past Evolutionary Trends in Primates

Primate Evolution: The First 60 Million Years

Chapter 5: What Can the Fossil Record Tell Us about Human Origins?

Hominid Evolution

The First Hominids (6"3 mya)

The Later Australopithecines (3"1.5 mya)

Explaining the Human Transition

Early Homo Species (2.4"1.5 mya)

Homo Erectus (1.8"1.7 mya to 0.5"0.4 mya)

The Evolutionary Fate of Homo erectus

The Evolution of Homo sapiens

An Archaic Human Population: Neandertals (130,000 to 35,000 years ago)

Middle Paleolithic/Middle Stone Age Culture

Anatomically Modern Humans (200,000 years ago to present)

The Upper Paleolithic/Late Stone Age (40,000? to 12,000 years ago)  
The Fate of the Neandertals  
Upper Paleolithic/Late Stone Age Cultures  
Spread of Modern Homo sapiens In Late Pleistocene Times  
Two Million Years of Human Evolution  
Chapter 6: How Do We Know about the Human Past?  
Archaeology  
Interpreting the Past  
Whose Past Is It?  
Plundering the Past  
Contemporary Trends in Archaeology  
Chapter 7: Why Did Humans Settle Down, Build Cities, and Establish States?  
Human Imagination and the Material World  
Plant Cultivation as a Form of Niche Construction  
Animal Domestication  
The Motor Of Domestication  
Domestication, Cultivation, and Sedentism In Southwest Asia  
The Consequences of Domestication and Sedentism  
What Is Social Complexity?  
Archaeological Evidence for Social Complexity  
How Can Anthropologists Explain the Rise of Complex Societies?  
Chapter 8: How Does the Concept of Culture Help Us Understand Living Human Societies?  
Explaining Culture and the Human Condition  
Cultural Differences  
Culture, History, and Human Agency  
Writing against Culture  
The Promise of the Anthropological Perspective  
Module 3: On Ethnographic Methods  
A Meeting of Cultural Traditions  
Single-Sited Fieldwork  
Multisited Fieldwork  
Collecting and Interpreting Data  
Chapter 9: How Do Cultural Anthropologists Learn about Contemporary Ways of Life?  
Ethnographic Fieldwork: A Short History  
The Dialectic of Fieldwork: Interpretation and Translation  
The Effects of Fieldwork  
The Production of Anthropological Knowledge  
Anthropological Knowledge as Open-Ended  
Chapter 10: Why Is Understanding Human Language Important?  
Language and Culture  
Design Features of Human Language  
Language and Context  
Pidgin Languages: Negotiated Meaning  
Linguistic Inequality  
Language Ideology  
Language, Culture, and Thought  
Language, Thought, and Symbolic Practice  
Languages, Symbolic Practices, Worldviews  
Symbolic Practices, Worldviews, Selves  
Chapter 11: How Do Symbolic Practices Shape Human Lives?  
Play  
Art  
Myth

Ritual  
Worldview and Symbolic Practice  
Religion  
Worldviews in Operation: Case Studies  
Maintaining and Changing a Worldview  
Worldviews as Instruments of Power  
Chapter 12: How Do Anthropologists Study Economic and Political Relations in Contemporary Human Societies?  
Anthropologists Study Social Organization  
How Do Anthropologists Study Politics?  
Hidden Transcripts and the Power of Reflection  
How Do Politics and Economics Shape Each Other?  
How Do Anthropologists Study Economics?  
Distribution and Exchange  
Production  
Consumption  
Chapter 13: Where Do Our Relatives Come From, and Why Do They Matter?  
Kinship  
Patterns of Descent in Kinship  
Lineages  
Kinship Terminologies  
Adoption  
Marriage  
Marriage as a Social Process  
Marriage and Economic Exchange  
Family  
Transformations in Families over Time  
Sexual Practices  
Sexuality and Power  
Chapter 14: What Can Anthropology Tell Us about Social Inequality?  
Gender  
Class  
Caste  
Race  
Ethnicity  
Nation and Nationalism  
Chapter 15: What Can Anthropology Tell Us about Globalization?  
Cultural Processes in a Global World  
Globalization and the Nation-State  
Human Rights and Globalization  
Cultural Imperialism, Cultural Hybridization, and Cosmopolitanism  
Module 4: What Can Anthropology Contribute to Everyday Life?  
Anthropology Beyond the University  
Anthropology and the Challenges of Global Citizenship  
Awareness and Uncertainty
