In the fourth edition of this book Alan Twelvetrees has brought thoroughly up to date his international best seller "Community Work." He describes both theory and practice in a highly readable and honest way, drawing on his own professional experience and mistakes and addressing the needs of community workers at field level, of managers, and of students. The section on specialist community work has been expanded and updated, while the last chapter, again drawing on practice, presents a well worked out case for placing community work at the center of neighborhood renewal, and is a "must" for urban and rural regeneration professionals.

正如系裡社區工作榮退教授老太太說，集體手法還是個體手法，都沒有錯
[哎，個體化的社會，集體行動越來越無力了～
