Bug lovers rejoice From laboring dung beetles and marching ants, to curious mantises, mysterious moths, and smelly stink bugs, "Incredible Insects " is a full-color visual feast for young readers. In 46 eye-popping spreads, photographs of crawling, flying, slithering bugs showcase the tiny world of insects in new and totally captivating ways. Coupled with fun facts and amazing records, these jaw-dropping photographs dominate each double-page spread and instantly draw the reader into the wonder of the natural world. "Incredible Insects " provides "under-the-rock" access to a rich variety of bugs as you've never seen them: Up-close and personal
