When kids open the heavy board covers of this miniature portfolio theyall find a small, information-packed, spiral-bound instruction book attached to its inside front cover

and a pad of art paper fastened to the back cover. The instruction book demonstrates the basics of sketching faces, figures, animals, landscapes, and the like. Attached to the portfolioas inner spine is a box of supplies for sketching pictures: pencils, eraser, sharpener, and water-soluble markers. Hereas a great take-along activity kit to keep children creatively occupied on car trips or for quiet-time fun.
