Here's an original and fascinating new approach to miniature art kits for kids. A mini portfolio with sturdy board covers opens to present an attached spiral-bound art instruction book plus a packet of very unusual drawing paper. Kids will find basic instruction for sketching faces, animals, human figures, and more on the scratch-off

paper. Each 3 1/8" x 4 1/8" sheet of art paper is coated with a colored surface that scratches off so kids can produce lines, squiggles, and shapes of all kinds at the firm touch of a stylus. A wooden stylus is packaged with the kit, along with a sharpener to keep the stylus point properly shaped for best effects. Kids will have lots of fun doodling, sketching, and developing their drawing skills with these imaginative little kits.
