isbn:9781417729593

Presented in an easy-to-read format and filled with tips, hints, and suggestions, this guide helps students create imaginative, distinctive short stories. The first section of the guide looks at the process of writing short stories and offers creative alternatives

for students to follow instead of taking the beaten path. The second segment offers chapters that focus project-specific solutions and suggestions, such as writing different types of stories. A "To Find Out More" section is also included to guide students to additional resources.
