The Team Performance Inventory is a proven, reliable assessment instrument that identifies a team's level of performance. This 40-item inventory measures: Interpersonal behaviors that highlight potential tensions within the team in areas of conflict, communications, shared values, and feedback The preferred approach to task accomplishment that identifies symptoms of nonperformance as well as earmarks of achievement of task accomplishment The influence of the team leader's style on outcomes which benches the leader's current style with a preferred leader style associated with each stage of performance. Use this inventory along with the

facilitator's guide and participant workbook to create a powerful workshop that has been proven to enhance the performance of teams!
