"Anatomy and Physiology Revealed" is the ultimate interactive cadaver dissection

experience. This state-of-the-art program uses cadaver photos combined with a layering technique that allows the student to peel away layers of the human body to reveal structures beneath the surface. "Anatomy and Physiology Revealed" also offers animations, histologic and radiologic imaging, audio pronunciations, and a comprehensive quizzing tool. It can be used as part of any one or two semester undergraduate anatomy and physiology or human anatomy course; "Anatomy and Physiology Revealed" is available stand-alone, or can be combined with any of McGraw-Hill's anatomy and physiology textbooks.
