Rev. Isaiah Reid (1836-1911), a leader in the American Holiness Movement, had a devoted national audience for his weekly editorial column. Some of his most-loved writings were his "Sunnyside Papers," articles in which he discovered and unfolded spiritual truths from nature. His subject matter ranged from the ordinary dandelion to the majesty of Mount Shasta. This new book, "Sunnyside Papers," is an annotated collection of some of Reid's best nature pieces and devotional material. With a foreword by famous holiness writer, Dr. Beverly Carradine, editors Jim and Denise Kerwin present for the first time a title that Reid had hoped to publish in his lifetime.
