After working in the juvenile facilities for 4 years, it was then when I realized our teenagers were in crisis. I'm speaking about teenagers from all nationality from the urban city to the suburban community teenagers who went to public schools and teenagers who attend private schools from single household and two-parent household. As an author and a person who worked in the juvenile detention I felt it was important to inform others about teenagers daily struggle. The teenagers in this book were willing to help other teenagers so they won't make the same mistakes they made and also successful teenagers who were willing to help teenagers stay on the right path. Their amazing stories will fascinate you.
