As we march on through another year of war, many service members have already completed more than one deployment. Astonishingly, a lot of these service members are mothers, and they are not only balancing their commitments to their families but to the nation as well. My Mommy Wears Combat Boots is based on the personal experience of a soldier and a mother who was seeking a way to explain why she needed to leave her child again and go to war. Young children are very limited when it comes to communication skills, and often have a difficult time expressing guilt, frustration, anger, loneliness and sadness and often don't realize that it's normal to feel all of this and more as the result of their mom's deployment. Books about mommies

going to war are few and far between, and My Mommy Wears Combat Boots is for mothers in uniform everywhere that are seeking a way to explain to their children the emotions associated with deployment and a way to positively channel those emotions when they are away.
