出版者:Routledge

出版时间:2002-1-1

装帧:Paperback

isbn:9780415257824

The Philosophy of Science Reader is a comprehensive anthology that draws together leading philosophers writing on the major themes in the philosophy of science. Alex Rosenberg and Yuri Balashov have carefully chosen articles in chapters under the headings: Science and Philosophy, Explanation, Causation and Laws, Scientific Theories and Conceptual Change, Scientific Realism, Testing and Confirmation of Theories and Science in Context. Each section is prefaced by an introductory essay by the editors which guides students gently into each topic. The book includes articles by leading philosophers, is highly accessible and user-friendly and provides a broad ranging exploration of the subject drawing from classic and contemporary articles. Ideal for any philosophy student, this book will prove essential reading for any philosophy of science course. The readings are designed to complement Alex Rosenberg's textbook, *Philosophy of Science: A Contemporary Introduction* (Routledge 2000) Moritz Schlick, Alex Rosenberg, Carl Hempel, van Fraassen, Philip Kitcher, Wesley C. Salmon, J.L. Mackie, John Earman, Ernest Nagel, Paul Feyerabend, Philip Kitcher, Ernest Nagel, Larry Laudan, Gary G

## 评论

配合Rosenberg的导论食用效果很好。对应着导论的章节分类选取了比较经典的阅读材料，对于帮助理解学科概念和关切的问题有很大的帮助。（我时不时觉得这个选文的质量比导论高得多，能学到更多w）

-----  
So very succinctly and clearly written
