Texas Hill Country in the 1870s was as close to the devil's stew pot as you can get. The Comanche, Kiowa and Cheyenne had banded together in a desperate fight against the whites who seemed to annihilate the buffalo herds. Rebels returning from the Civil War began cattle rustling leading to massive feuds. The Ninth and Tenth Cavalry - known as "buffalo soldiers" by the Indians they fought - were mustering out only to find a hostile freedom at best. Rumors of a Lost San Saba mine were luring adventures of the worst sort into the heart of this unforgiving mess. Into all this rides 17-year-old Mick, without a gun, looking for his last living relative, Bill Hinton. Then he meets Syd, a Mexican girl, who is just as determined to find Bill Hinton...and kill him.
