The A and P Laboratory Manual by Allen and Harper presents material covered in the 2-semester undergraduate anatomy and physiology laboratory course in a clear and concise way, while maintaining a student-friendly tone. The manual is very interactive and contains activities and experiments that enhance students' ability to both visualize anatomical structures and understand physiological topics. Lab exercises are designed to require students to first apply information they learned and then to critically evaluate it. All lab exercises will be intended to promote group learning and to offer learning experiences for all types of learners (visual, kinesthetic and auditory). The lab exercises are also written so as to be easily adapted for used in distance learning courses.
