When Spanish explorers arrived on the coast of South America, they found that natives had built their homes on stilts among the swampy shore of Lake Maracaibo. Because this reminded the Europeans of the city of Venice, they named the region Venezuela (Little Venice). Today, Venezuela is one of the leading oil-producing nations in the world. It has a high rate of population growth, and most of its people live in urban areas. As the sixth-largest country in Latin America, Venezuela has great influence on its neighbors economically, politically, and culturally. Each lavishly illustrated book in the "South America Today" series teaches about the geography, history, economy, and culture of each nation. Each volume is indexed, and contains a bibliography featuring books and Web sources for further information.
