This is our fourth "handy book" by Dan Beard, the founder of the American Scouting movement, who believed that having boys build things with their hands was not only a

detriment to making mischief, but also the basis for building great lives. In this belief, Beard was indefatigable, and every Scout worth his merit badge was expected to read his classic tract on camp-lore and woodcraft, which included instructions on how to build a good fire, cook venison, prepare for a camping trip, and use an axe and a saw.
