This book provides an overview of the developments and innovations within this area, covering the manufacture of many different types of carpet. It begins by discussing the different types and requirements of carpets, along with the structure and properties of the carpet fibers and yarns that are used. The book then explores recent developments in the manufacture of carpets. Topics include the advances in carpet weaving and the reduction of static in carpets. The book also examines a selection of carpet types, including wool carpets, textile sports surfaces and handmade carpets.
