Through my experiences fighting a force I did not understand, these shaped me at the core of my identity: my childhood, my parents, trepidation, outstanding successes, indecision, thrills and often something troublesome. This life as fabric intertwine emerge in my life and perhaps yours, too. Yet all of these interactions alter who I am and just how I view myself and life. Disenchantment: Lost in Chaos offers real life entwined with motivating messages with discovery that has brought challenges. Simply put: the men in my life. But today, my life is just fine. Feeling good about yourself feels absolutely wonderful. Painful experiences and triumphs is the exploration of this book.
