Earworms are those irritating song fragments and jingles that get inside your head and refuse to leave willingly. Most people hate them. Not Andy. His earworm is alive. Andy's astonishing overnight metamorphosis from novice to master musician begins inside a hidden room in his house where he finds one of the first electronic musical instruments ever built. Like his earworm, the songs he creates with this antique theremin seem to communicate directly with people's souls, and may have incredibly unique capabilities and virtually limitless potential. Andy's music might ultimately prove to be the most powerful force in the universe, but can the world survive his audition?
