Each school of thought within economics adds something unique and valuable to economic scholarship. Despite this, achieving productive discussion and debate across schools of economic thought is not a simple matter. This volume is an attempt to break down the varied barriers that have been erected to economic pluralism. With contributions from a galaxy of economists - including David Colander, Robin Hahnel, Yanis Varioufakis and Fred Lee - this book is an important read for economists everywhere and will be especially cherished by those economics academics with an open mind.
