A portfolio of Nigel Dennis' best work selected from 30000 images of Africa's spectacular wildlife, taken over a period of 10 years. The stunning larger than life photographs - over 200 in total - cover most of the larger mammals in Africa, broken down into six main groupings together with separate chapters on birds and reptiles, as

well as a chapter on Madagascar. This collection of photographs is thus a tribute to an inspiring naturalist and an extraordinary artist who has sought to capture the very essence of the land and the animals he has grown to love. With concise text by Brian Johnson Barker and consultant Gus Mills, a well-known authority on wildlife.
