This book presents a selection of the most interesting proposals in interior design.

They show a return to more humanised concepts based on the profound relationship between people and space. In offering solutions to different types of apartments, the book successfully strikes a balance between function and aesthetics, between the essential and the non-essential. Included are floor plans, technical specifications, materials used and commentary on each project, all provided by the designing architects themselves. Eldridge Smerin, Drewes Architects, GAP Architetti Associati are just two of the architectural luminaries who have contributed to this fine selection.
