If you are a gardener, groundsman, smallholder or farmer and have a 'mole problem', then this book will be of enormous help to you. Pest-control books normally only devote a paragraph or two to moles and rarely cover the subject in detail. This volume is very different and is probably one of the most comprehensive books ever written on mole trapping. Throughout the book, Jeff Nicholls, a professional mole catcher, reveals his enormous respect for the mole and emphasizes the absolute need to control these rarely seen animals using humane and traditional methods that have been proven to work effectively.
