D. H. Lawrence is often seen either as an artist whose novels are spoiled by the intrusion of ideas or as a philosopher whose ideas happen to be expressed in fiction; neither of these perspectives does justice to the unity and complexity of Lawrence's vision. In *The Visionary D. H. Lawrence* Robert E. Montgomery places Lawrence in the tradition both of great Romantic poet-philosophers, including Blake, Wordsworth, Coleridge, Shelley, Carlyle and Emerson, and of visionary thinkers Nietzsche, Heraclitus and Jacob Boehme. Dr Montgomery reveals a context which illuminates Lawrence's fiction and non-fiction, discusses his work in depth, and shows how his place in the prophetic-poetic tradition differs from that of his contemporaries Eliot and Yeats. The result is an exploration of the vision that informs and unifies Lawrence's work.
