This work presents a mystical tale about the journey of a Soul. The words used throughout the story were inspired by "Sacred Circles". The book is dedicated to each person, connecting with one another in love and harmony. The journey begins before time was created and takes the reader through the creation of worlds and people. Along the way, one becomes separated from the Source and must reconnect with their source of joy. "Images of Sacred Geometry" illustrate the story and are explained in the Afterword. In addition, a word meditation focuses on the messages of words throughout the story.
