Ever dream about making 30% in one month?

Big Money, Less Risk: Trade Options will put the income boosting power of strategies like writing covered calls, selling naked put options, and placing vertical spread trades or iron condors in your hands. Mark Larson has become one of the most sought after trading educators because of his ability to make once elusive investment approaches accessible to every trader.

Success in the stock market is determined by consistently making money every month, not closing your eyes and hoping you can afford to retire. With this book, Larson divulges the secrets to making your money work for you instead of having to work for your money.

Inside you'll learn:

- How to repeatedly make money when the market goes up or down.
- Investment strategies that allow for huge returns with the use of very little money.
- How to purchase good stocks at discount prices.
- How to make significant returns even if you are wrong on the trade.

Larson will also cover the importance of option pricing, implied volatility, the Greeks such as delta, theta, and gamma, and the probability of your option expiring profitable. Most important, you will get, in plain English, some of his favorite technical indicators and the key to how they will form the basis of your options trading success.
