This volume contains papers presented at the Materials Innovations in an Emerging Hydrogen Economy Conference in February 2008 in Cocoa Beach, Florida. It provides a useful one-stop resource for understanding the most important issues in the research and applications of materials innovations. The text features logically organized and carefully selected articles, organized into: International Overviews; Hydrogen Storage; Hydrogen Production; Hydrogen Delivery; and Leakage Detection/Safety. This comprises an essential resource for industrial and academic chemists and engineers.
