

Environmental Sociology

[Environmental Sociology_ 下载链接1](#)

著者:Ling, Leslie (EDT)/ Mccarthy, Deborah (EDT)

出版者:Rowman & Littlefield Publishers

出版时间:2009-3

装帧:Paperback

isbn:9780742559097

This environmental sociology reader emphasizes utilizing the sociological imagination to examine the race, class, gender, and other power dimensions that intersect environmental issues. It includes excerpts from recently published pieces that use various sociological perspectives, especially critical frameworks, to examine a wide range of topics—from the globalization of hazardous wastes and industries to mountaintop removal for mining to the construction of nature in a television sitcom. This second edition, like the first, aims to engage undergraduate students, and includes nine new selections chosen from recent work. A section on social constructionism has been added, and the section on science, risk, and health has been expanded to mirror the increased interest in that field. The new edition also includes a chapter on climate change and new selections in the section on 'Thinking about Change/Working for Change,' which helps students see how individuals can affect the future of the planet through their actions.
