This book provides an overview of all aspects of radiography for the practitioner. It is written to address the areas of practice of assistant practitioners and practitioners within the clinical environment. Areas covered range from ethics and communication,

through to the physics of radiography and x-ray production, and specialist techniques. Anatomy, physiology and pathology are also covered, ensuring the text is a complete introduction to radiography. Each chapter covers key points and provides revision questions (with answers) and recommended reading for exploring the chapter topic in more depth.

Very structured text with clear headings and relevance to practice indicated throughout

Chapter style will enable students to dip into text to find relevant information as an aid to revision

Set of revision questions at end of each chapter

All contributors currently teach Assistant Practitioners and student radiographers
