isbn:9780853698241

This is a revision guide for students giving bullet points of basic information on pharmacology. "FASTtrack" is a new series of indispensable revision guides created especially for undergraduate pharmacy students. Basic information is provided on all main areas of study for the MPharm in small concise texts. Each title provides a summary of all key information along with diagrams, cases and questions and answers for self assessment. The books are practical, easy to read and well-priced and complement textbooks and aid students with revision for examinations. This specific title is a basic revision guide in Pharmacology covering all systems in the body. This revision guide includes mechanisms of action, adverse effects and clinical context for each drug group under each system. Most importantly this text is applicable to medical and pharmacy students alike, especially so, as it is written by lecturers in pharmacology from the university of Nottingham medical school who teach undergraduate medical and pharmacy students. A FASTtrack website includes MCQs, sample online content and much more.
