Practical, comprehensive, and updated throughout, the 4th edition of "Dermatological Signs of Internal Diseases" helps you identify a full range of common and rare systemic diseases early so they can be managed as effectively as possible. Coverage of new disorders, including nephrogenic fibrosing dermopathy, new treatment options, expanded histopathology content, new color images, a CD image bank, and more help you attain definitive diagnoses of internal diseases that manifest on the skin. Best of all, each chapter features an evidence-based approach to diagnosis and treatment so you know you can depend on the clinical recommendations presented.
