"A simple narrative follows the growth of a pair of black bear cubs through the seasons. . . . Facts and attractive illustrations round out the volume." — THE HORN BOOK

Deep in a forest cave, a mother bear gives birth to two tiny cubs. As they

grow, she protects her cubs fiercely and teaches them all the things they need to know to survive in the wild. The cubs must learn how to catch fish in the raging river, gather berries in the woods, and climb trees to escape from danger — for one day, during their second summer, they will leave their mother to find homes of their own.
