We've heard it all: Scrapbooking is too time-consuming, too expensive, too complicated. But it really doesn't have to be, and this book proves not only that, but that it's fun, too! Readers learn just how easy scrapbooking can be with the right

mindset and a few simple techniques. Scrapbook instructor and author Kathy Fesmire teaches readers with step-by-step instruction how layouts they create can be fast, fun, frugal and fabulous. Finished artwork by the author and her contributing artists illustrate techniques as well as additional tips and tricks for saving time and money. As an added bonus, each layout is accompanied by an icon that indicates how much time a page takes to complete.
