It's natural to feel a little nervous about going to the doctor. But this book's concrete and kid-friendly approach will put everyone's fears to rest. Join three children and their parents as they visit their paediatricians for a typical check-up, and learn all about the different tools doctors and nurses use. Upbeat illustrations featuring a diverse cast of characters are paired with a breezy rhymed text that reassures young readers - and

their grownups - by guiding them through a physical examination step by step.
