America's national parks and historical sites embody the American spirit. They are windows to our past, homes to some of our rarest plants and animal species, and places where every American can go to find inspiration, peace, and open space. From the iron rails of Steamtown, Pennsylvania to the wilds of Yellowstone, America's natural parks preserve our culture in as much as they shield our natural world from our own encroachment.

The National Parks: Our American Landscape presents a wonderfully updated photographic survey of one of America’s greatest national treasures. Seen through the eyes of the National Parks Conservation Association’s photographer Ian Shive, America’s National Park System come to life through a collection of more than 200 new photographs. Shive's stunning work demonstrates the diversity and awe inspiring beauty of the American wild lands covering the major United States parks from the warm waters of Biscayne, Florida to icy summit of Mt. McKinley in Denali National Park, Alaska.
