After finding a mysterious, handmade field guide in the attic of the ramshackle old mansion they've just moved into, Jared; his twin brother, Simon; and their older sister, Mallory, discover that there's a magical and often capricious world existing parallel to our own -- the world of faerie. Now their entire New York Times bestselling adventure is available in one exquisite volume. Featuring all five books in the original Spiderwick Chronicles series, this handsome edition also includes three recently unearthed bonus chapters; an exclusive "making of" section filled with early sketches of characters like the Grace kids, Thimbletack, and Hogsqueal; and, as a special added bonus, an all-star gallery where other popular artists put their spin on the characters and creatures that populate the world of Spiderwick. Fans and novices alike will treasure this handy, all-in-one introduction to the world of Spiderwick!
