I borrow the car again from Grandma and drive out to my hill. I scream I am a big fat zero, plus I am swearing off kissing forever, and I hate being a secret sex fiend, about sixteen times each. Then I sit very still and watch a hawk swirl over the fields. I have to get a new life before I go crazy. Sixteen-year-old Morgan lives in a hick town. Her mum was killed in a car accident when she was two, her dad drinks, and her stepmother is a non-entity. Her boyfriend Derek is boring and she can't stop staring at her co-worker Rob's cute butt. Then there's the kiss she shared with her neighbor Tessa. But when Morgan discovers a devastating secret about the one person she completely trusted, her entire world crashes and she must redefine her life and herself. Compelling and complex, "The Sky Always Hears Me" is a fast-paced narrative with raw humour and a heart-wrenching twist.
