Shortly after my second child was born, he began to experience labored breathing that resulted in vomiting episodes. Every time he experienced one of these episodes, his blood oxygen levels would decrease and his fingernails and lips would turn a bluish color. He was admitted into the neonatal intensive care unit where he underwent multiple tests. The fees exceeded \$16,000, yet yielded no productive information. It was then I decided to adjust his spine to restore balance to his body. After this life changing adjustment, his medical problems ceased, and he had true complete health. Our medical system is focused on chasing a symptom in an effort to cover it up, rather than treat the whole person and restore balance. Your body has the ability to function normally, or in balance, allowing you to feel your best. When your body is out of balance, it's time to see a chiropractor.
