This volume addresses a range of philosophical and ethical issues in adapted physical

activity and disability sports participation more broadly. It is comprised of a range of essays by international scholars whose backgrounds embrace different traditions of philosophy, pedagogy and adapted physical activity. The principal aim of the symposium was to open up and critically explore a range of conceptual and ethical issues and perspectives that have arisen with respect to the engagement of persons with dis/abilities in a range of physical activity contexts including, but not exclusively located in, mainstream sporting activities. This book was published as a special issue in Sport, Ethics and Philosophy.
