The Far North is a region shared by Canada, the U.S. (Alaska), Russia, Denmark (Greenland), Norway, Iceland, Sweden and Finland. For those who don't live there, the region appears to be a bleak, desolate place of snow, ice, glaciers and bitter cold. But

the Far North is home to many plants, animals and people who have developed remarkable ways of adapting to one of the harshest climates on Earth. This book in the Kids Book of series examines the region's fascinating history, modern life and fragile ecosystem with facts, stories, legends, illustrations, timelines and maps.
