This volume celebrates the career of archaeobotanist Professor Gordon C. Hillman. Twenty-eight papers cover a wide range of topics reflecting the great influence that Hillman has had in the field of archaeobotany. The papers are split into four sections: Personal reflections on Professor Hillman's career; archaeobotanical theory and method; ethnoarchaeological and cultural studies; and ancient plant use from sites and regions around the world. The collection demonstrates, as Gordon Hillman believes, that the study of archaeobotany is not only valuable, but vital for any study of humanity.
