"Jane's Urban Transport Systems" surveys the systems, manufacturers and consultants within the global market. City by city, you can analyse and review current operations and future plans. Traffic statistics are given, together with fleet lists and numbers in service. To locate new suppliers and identify market opportunities, there are details of approximately 1,300 manufacturers, including contacts, company backgrounds, product lines and contracts gained. The key contents include: organisational structures; traffic statistics; current operations; recent proposed developments; fleet data; principal infrastructure details; manufacturers and services; rail vehicles; electric traction equipment; rail and bus components and subassemblies; electrification contractors and equipment suppliers; new technology/innovative transit systems; buses - chassis, integrals and bodies; road vehicle chassis components; signalling, communications and traffic control equipment; passenger information systems; revenue collection systems and station equipment; vehicle maintenance equipment and services; permanent way components, equipment and services; turnkey systems contractors; information technology systems; and, consultancy services.
