isbn:9780071634410

This is the most comprehensive book available on all aspects of this revolutionary technique! 'Small incision cataract surgery is arguably the most gratifying and efficient

procedure currently practiced in all of medicine. Moreover, it likely yields the best cost to benefit ration of all surgical procedures...I anticipate that all cataract surgeons, and in turn their patients, will benefit from this epic work, as a result we are indebted to Dr. Garg and his co-editors' - Samuel Masket, MD, Clinical Professor, Jules Stein Institute, UCLA Center for Health Services (from the foreword). This unique textbook is dedicated to the art and science of the chop procedure. Contributors with vast experience and varied geographic practice settings offer their individual perspectives on the technique. The reader can benefit not only from the written words, but also from the a DVD containing videos of the various techniques discussed.
