Atoms! Colors! Space! Robots! Science is awesome, especially when it's presented in such an engaging, innovative package. Inside this fantastic spiral-bound book, junior Einsteins discover a detailed introduction to science, with topics ranging from matter and chemicals to technology and scientific frontiers. Each subject comes to life through detailed illustrations, incredible photos, and pullout diagrams, while colorful sidebars highlight important facts and statistics. Unique acetate sheets for five key topics allow a deeper review of the subject matter. Adding to the fun are an eye-catching 3-D lenticular cover, two giant color posters, and an exciting hands-on science project.
