Come along on an adding animal adventure. Add baby animals to the adults to see how many there are all together. And while you are at it, learn what some of the zoo animals eat or what the baby animals are called. Follow the little lost red balloon as it soars through the zoo. At the end of the day, count up all the animals you have seen. The For Creative Minds educational section includes: How many animals do you see?, Tens make friends, Adding by columns, Fact families, Food for thought, Animal

matching activity, and Animal classes.
