Author, artist, and clinical psychologist Robert W. Firestone and collaborator Joyce Cattlet dig deep into the psychology of destructive behavior-both its source and how it manifests itself in personal relationships between men, women, couples, and families, and in the social arena.They posit that if we can understand the source of aggressiveness and learn to cope with the urges it impels, we can better rear future generations and improve mental health practices in general. This position offers a hope of altering what many people consider to be humankind's basically unethical nature.
